

DISPEC Third Networking Meeting

11 December 2025 | Toulouse, France

You are invited to join us for the DISPEC Third Networking Meeting!

The DISPEC project is an **EU-funded initiative** developing **advanced data processing techniques** for improved ionospheric specification. DISPEC jointly processes space- and ground-based observations to deliver high-quality data products and explore long-term ionospheric trends linked to atmospheric dynamics and geophysical phenomena. The resulting **open-access methodologies and data products** invite active involvement from users, innovators, and stakeholders to ensure practical impact and scientific excellence.

Join us in Toulouse to **connect, collaborate, and co-create** the next generation of ionospheric data tools and applications.

Key topics for discussion:

- **Data Curation:** Advancing interoperability across space and ground datasets.
- **AI & Modelling:** Integrating innovative methods for ionospheric specification.
- **Applications & Services:** Enabling innovation in aviation, navigation, space safety, and defence.
- **Policy, Standards & Sustainability:** Shaping frameworks for long-term data governance and use.

Date and Place

- **Thursday, 11 December 2025**
- **ONERA Toulouse Centre,**
2 Avenue Edouard Belin, 31400 Toulouse, France
